

Name: DAVID FEINSTEIN

Address 477 FDR DRIVE N.Y. N.Y 10002 APT 207

(street number, city, state, country)

To the court in Vilnius, Lithuania,

I write to affirm that I (full legal name) DAVID FEINSTEIN

(Date of birth) 7/3/29 have many ancestors and relatives buried throughout the grounds of the Old Jewish Cemetery at Piramont, in today's Snipiskes, most probably on some or all sides of the Soviet-era sports palace. My famous ancestor is Rav Avraham Ragoler the brother of the Gaon of Vilna. He was not buried in the old cemetery of Vilna. However, his father Rav Shlomo Zalmen Vilna (also the father of the Gaon of Vilna) also my ancestor, was buried in the cemetery (grave #20 recorded and mapped in Klausner's book) as were his ancestors Rav Eliyahu Chasid Kramer (grave # 13 mapped and recorded in Klausner's book)and his famous father in law Rav Moshe Rivkes-The Beer Hagolah (grave #3 recorded and mapped in Klausner's book) They were ancestors of many many huge families residing throughout the world today as listed in Chaim Freedman's book " Eliyahu's Branches...The Descendants of the Vilna Gaon and His Family" . These burial plots were duly and honorably purchased in freehold (perpetuity) by the family of the deceased on each occasion and have never and can never be sold to any other party, neither private or government. I hereby petition the authorities and powers that be in the Republic of Lithuania to stop the planned desecration of my relative's graves via a National Convention center, where many thousands would gather to celebrate, cheer, clap, sing, use bars and lavatories, and congregate in levity and mirth not befitting my holy ancestors sacred burial ground.I appeal for relief and justice from the courts in asking the Honorable Court to instruct the powers that be to relocate the convention center at another location where it would not desecrate, humiliate, and dishonor the memory of my relatives in Lithuania, and result in the de-facto theft of my family's cemetery land that was purchased in perpetuity
